

Sydney Colocation and Data Center Space

Sublime IP provides the best choice and value in secure colocation (telehousing) in Australia and over 50 locations worldwide. Our primary data centre in Sydney is the Verizon Business data center in Pyrmont with a secondary facility run from Soul (Kent St, Sydney CBD). We can also provide colocation from Equinix (Mascot), Global Switch (Ultimo) and Fujitsu (North Ryde). This document details the specifications of the data centre and gives considerable insight into the quality of the facility.

Fujitsu IDC - North Ryde - Sydney

The Fujitsu Internet Data Centre is located centrally within the Eden Park Business Park at North Ryde. Due to relatively high data costs and other factors we no longer purchase space directly from Fujitsu. However, we do have several years experience of the facility and a good understanding of its strengths and weaknesses and we can provide quotations for colocation in the Fujitsu IDC for space requirements of half a rack (20 RU) and above, as well as smaller colocation requirements (from 1 RU) resold through a third party relationship managed by us.

Further information

To discuss your colocation, telehousing or dedicated server requirements or for further information, please contact Sublime IP by phone on 1300 SUBLIME in Australia (+61 2 9948 8888 internationally) or email sales@sublimeip.com.

Our online web site tool can also be used for requesting a global colocation quotation and indicative pricing for services from this facility. The tool is available at <http://www.sublimeip.com/internet/colocation/order/> and can calculate pricing for your requirements in Sydney and any of our other locations.
